PROFESSIONAL SUMMARY

Professional with 15+ years bridging data science, product management, and risk analytics across financial services and enterprise technology. Proven track record driving the full lifecycle of GenAI and ML-powered products — including LLM/Agent evaluation frameworks, AI asset monitoring, and MLOps platforms — while ensuring regulatory alignment, model validation, and responsible AI governance. Deep domain expertise in credit risk, compliance workflows, and financial modeling. Recognized for translating complex technical capabilities into actionable product roadmaps and measurable business outcomes in high-stakes, regulated environments.

EXPERIENCE

Oracle America, Inc.

Product Manager / Senior Data Analyst

Pleasanton, CA
Nov 2019 – April 2026

GenAI & AI Product Management

- Orchestrated full-lifecycle development of an enterprise AI asset monitoring and governance tool, establishing compliance frameworks and risk management protocols for Oracle's AI-integrated products and ecosystems.
- Led cross-functional product roadmaps for 5+ AI/ML products, including LLM/Agent evaluation, GPU clustering, and MLOps, partnering with engineering, sales, compliance, and enterprise customers.
- Participated evaluation strategies and quality metrics for generative AI outputs, including hallucination detection, output acceptance rates, and safety/compliance effectiveness across AI products.
- Developed financial models to optimize pricing for AI products, aligning infrastructure costs with revenue targets to ensure profitability and business value of AI investments.
- Collaborated for responsible AI practices and model validation processes, ensuring continued performance, regulatory alignment, and stakeholder trust across AI-powered platforms.

Data Science, Analytics & Platform

- Provisioned and architected OCI cloud services (IAM, security, storage, data science, developer tools) for 40+ internal team members, establishing a scalable environment for AI/ML workloads.
- Developed 5+ Python prototypes and reusable libraries leveraging ML, NLP to automate complex enterprise data processing and enhance decision-making systems.
- Engineered automated 3+ ETL pipelines and executive dashboards across multiple domains, including GPU utilization analytics and a global market intelligence suite that synthesizes company fundamentals and news-driven signals.
- Evaluated data quality across multiple Oracle databases and documented end-to-end data pipelines powering key business visualizations and compliance reporting.

Raisa Energy LLC

Analytics Consultant

Denver, CO
May 2018 – Aug 2018

- Designed prescriptive process optimization models and operational risk tools to support executive decision-making on resource allocation and investment workflows.
- Built predictive models for production forecasting using machine learning, delivering actionable insights to senior leadership through data visualizations.

Scalar Consulting – Interijento

Director of Technology & Risk Consulting

La Paz, Bolivia
Oct 2011 – Dec 2016

- Managed 5+ product development projects delivering risk analytics tools (credit scoring, compliance assessment) for 15+ financial institutions.

- Designed an over-indebtedness predictive model for the national financial regulatory system, directly supporting systemic risk monitoring and compliance oversight.
- Translated complex regulatory and business requirements into data product specifications and executive training programs for financial institution leaders.
- Built and delivered 7+ data science solutions to support credit risk modeling and decision-making for financial institution clients.

Agrocapital

VP of Credit Risk

Cochabamba, Bolivia

Oct 2006 – Aug 2011

- Led implementation of credit scoring models reducing loan defaults by 5% across the full portfolio.
- Managed 120+ employees across risk and commercial functions; grew portfolio to \$26MM (a 45% increase) while expanding geographical coverage from 3 to 7 states.
- Led village banking credit product redesign resulting in 50%+ reduction in loan defaults.
- Coordinated risk monitoring, compliance reporting, and market research ensuring data quality for commercial and regulatory strategies.

EDUCATION

M.S. Business Analytics – Data Science Track, UT Dallas (Dean's Award, GPA 3.97)

MBA, UCB (Honors) | **B.S. Economics**, UCB (Top 10%)

SKILLS

Product & Strategy: GenAI Product Vision & Roadmaps, PRDs, MVP Definition, Stakeholder Management, Agile, Product Lifecycle, Cross-Functional Leadership, Regulatory Alignment

Technical: Python, SQL, LLM/Agent Evaluation, Agentic Workflows, Hallucination Metrics, Model Validation, OCI Architecture, MLOps, AgentOps, ML/NLP, GPU Compute, Data Pipelines, ETL Automation

Domain: GenAI for Risk & Compliance, Responsible AI Governance, AI Risk Management, Credit Risk Modeling, Financial Services Regulations, Financial Modeling, Operational Risk

Languages: English (Full Professional) | Spanish (Native)
